Hi Tina;

This is the response to comments document we discussed. In it we rationalize how the findings of Box Elder Creek are readily transferable to western MT, and discuss our selection of 125 mg Cha and 35. This is a pretty good synopsis of our thinking and probably has not been widely read since it was a response to comments from Plum Creek on an earlier IR.

I have also attached Plum Creeks letter that prompted this analysis, FYI.

-Mike
